Jl. Rayasiborongborong, Desa Pakkat, Doloksanggul, Humbang Hasundutan, Sumatera Utara

My name is Dastin Raynold Sirait. Every day I study and work in front of a computer to develop knowledge about information technology, and develop my talents in the field of programming, building and developing applications. I have been involved in the world of programming since 2018, and I have also studied many computer programming languages

Projects

SPMB (Seleksi Penerimaan Mahasiswa Baru) IT Del

My team and I built an SPMB IT Del website where this project is a project in the form of a website where prospective IT Del students will register themselves on this website. My role in this project is as a frontend person who develops a design on this website, and also plays a role as an analyst in forming details of the website that will be built and also plays a role as QA in carrying out testing on the website in looking for errors and the suitability of the website, and on the project. I am working on displaying achievement and testimonial pages.
